

STUDENT JOB!

Are you looking for a challenging job that you can combine with your studies? Dispertech is a high-tech company based in Amsterdam. We build next-generation nanoparticle analysis devices.

We are looking for highly motivated candidates who want to work with optics, electronics, and programming in Python. It's an excellent opportunity to gain real-world experience in a dynamic environment.

Microscope Engineer

Requirements :

- Proactive attitude
- Some programming experience (with Python)
- Willingness to learn about optics and electronics
- Good communication skills

About the job:

- Located in Amsterdam Science Park (not remote!)
- Flexible schedule (minimum 16hours/week)
- Work aligning microscopes and performing tests
- Improve the software to control the instruments
