

Student job:

Junior Developer

Are you looking for a challenging job that you can combine with your studies? Dispertech is a high-tech company based in Amsterdam. We build next-generation nanoparticle analysis devices.

We are looking for highly motivated candidates who wants to work with optics and programming in Python. It's an excellent opportunity to gain real-world experience in a dynamic environment.

About the Job

- Located in Amsterdam Science Park
- Flexible schedule (minimum 16 hours per week)
- Assist in one of the following:
 - Software development
 - Hardware development
 - Lab-based experimental work
- Get to work with high tech equipment

Ideal Background

- BSc in Physics, Mechatronics, Biomedical Engineering, Computational Science or similar
- Comfortable with Python (or other object-oriented language)
- Willingness to learn GUI frameworks, hardware integration, optics or lab skills

Bonus Skills

- Experience with optics
- Pipetting or any wet-lab experience
- Experience with 3D CAD design
- Exposure to electronics or microcontrollers
